Portfolio

Portfolio Value & Operations

Operating decisions across the estate: cost, service, productive use and asset value

Portfolio: Needs attention

3 simulated sites · 1 mini-grid / 1 cold room / 1 charging hub

Assessment scope & periods ↗

O2 Operating-cost exposure →

$3.31–3.97

Kobo · 30 min avoidable generator time

Modelled + scenario · one-hour window

O3 Service & stock risk →

2 sites

Cold-room excursion + interrupted charging · 4 risk signals

Measured events · not priced

O1 Productive-use opportunity →

18–20 kW

Kobo · headroom on 3 of 5 days

Modelled · demand validation remains

O4 Asset life →

5 early stress warnings

Battery below reserve · overdue servicing · charger fault

Not a condition assessment · not priced

O6 Verified value recovered →

Not established

Intervention outcomes need more evidence

Completed work does not establish savings

3 priority sites · **1** opportunity · **3** site evidence gaps · **3** accepted actions · **14** signals not yet priced

Distinct consequence categories · no combined savings total

Where management should act first

Findings ranked by consequence and urgency, with evidence confidence alongside.

6 FINDINGS

All priorities | Cost | Risks | Opportunities

6 findings

SITE	FINDING / OPERATING MECHANISM	VALUE / CONSEQUENCE	PRIORITY	CONFIDENCE	ACTION / NEXT MOVE
GreenHarvest Cold-chain	**Backup response failed** F-118 · Automatic start failed; cooling interrupted Moves: Cooling continuity, Stock kept saleable · through backup readiness · Must not harm: Compressor life	**Product conditions exposed** Measured peak 8.2°C · loss unpriced 6 Oct · 19:00–20:00	High	High Observed sequence	**ACT-051** Witness an automatic-start test Open
Kobo Mini-grid	**Extended generator support** F-104 · 30 min candidate; charging trade-off remains Moves: Supply cost per kWh · through generator and battery settings · Must not harm: Reliable service, Battery and generator life	**$3.31–3.97** Modelled fuel + scenario maintenance 6 Oct · 14:20–15:20	High	Low ⓘ PCS capability gap	**ACT-048** Verify the policy trial Outcome pending
Depot EV charging	**Charging session interrupted** F-130 · Fault-aborted session; root cause unknown Moves: Buses ready to run · through charger faults · Must not harm: Battery and charger life	**1 interrupted session** Measured events · revenue loss unpriced 6 Oct · 08:00–16:00	Medium	Medium ⓘ 1 other outcome unknown	**ACT-061** Investigate connector 2 Open
GreenHarvest Cold-chain	**Temperature excursion** F-119 · Chamber above 4°C after backup failed Moves: Stock kept saleable · through chamber temperature control · Must not harm: Cost per cooling unit	**25–35 min above policy** Measured peak 8.2°C · no spoilage determination 6 Oct · 19:00–20:00	Medium	High Stock and loading not recorded	**Review recommendation** Record stock and connect the door log Open
Kobo Mini-grid	**Battery output-limit report missing** F-108 · One 14:50 report absent from the battery controller Moves: Evidence for investors · through battery reporting	**30 min unclassified** Evidence gap · limits F-104 6 Oct · 14:20–15:20	Medium	High Reporting cause unknown	**ACT-049** Restore battery-limit reporting Open
Kobo Mini-grid	**Productive-use headroom** F-109 · Recurring renewable capacity available Moves: Productive electricity sales · through spare daytime solar · Must not harm: Supply cost per kWh, Reliable service	**18–20 kW usable** Modelled headroom · $2.50 scenario sales Separate 5-day study · 3 eligible days	Medium	Medium ⓘ Demand not established	**Review recommendation** Evaluate a 10 kW productive load Recommendation

Priority and confidence answer different questions.

Outcomes across the estate

Each site's own reading · not a composite health score

	Kobo	GreenHarvest	Depot
Revenue O1	**Unknown** Productive electricity sales MG-1 Declared	**Not assessed yet** Paid cold-room use CC-2	**Watch** Charger use EV-3
Operating cost O2	**Needs attention** Supply cost per kWh MG-2 Declared	**Not assessed yet** Cost per cooling unit CC-3	**Unknown** Energy cost per km EV-2 Declared
Service and stock protection O3	**Unknown** Reliable service MG-5 Declared	**Needs attention** Cooling continuity · Stock kept saleable CC-6, CC-1 Declared	**Needs attention** Buses ready to run EV-1 Declared
Asset life O4	**Watch** Battery and generator life MG-4	**Watch** Compressor life CC-5	**Watch** Battery and charger life EV-4
Return on assets O5	**Not assessed yet** Site profitability MG-3	**Not assessed yet** Paid cold-room use CC-2	**On track** Room before depot expansion EV-5 Declared
Evidence and assurance O6	**Watch** Evidence for investors MG-7	**Watch** Quality evidence CC-7	**Watch** Evidence for depot investment EV-7

Each cell is that site's own reading of the outcome. Not assessed yet is not healthy. Signals not yet priced →

"Declared" objectives are set for this demonstration

Which outcomes get one: proposed, pending owner decision

Evidence that would change a decision

Restore Kobo's missing PCS capability report to resolve two indeterminate dispatch intervals.

Inspect the constraint →

Signals not yet priced

Direction and evidence where money cannot be calculated yet

All 14 →

- Risk — **Repeated maintenance without result**
  GreenHarvest · Risk to Cooling continuity · not priced
- Risk — **Generator kept running while the battery could carry the load**
  Kobo · Risk to Supply cost per kWh · not priced
- Early stress warning — **Battery went below its 30% reserve**
  Kobo · Early stress warning · Battery and generator life · not a condition assessment · not priced
- Risk — **Connector 2 out of service**
  Depot · Risk to Buses ready to run · not priced
- Opportunity — **Daytime solar left unused**
  Kobo · Opportunity for Productive electricity sales · not priced

GROW USEFUL DEMAND

An opportunity beyond reducing cost

Scenario

10 kW × 1 h — Grain-mill evaluation at Kobo

→

$2.50 — Scenario gross sales per eligible window

Within 18–20 kW headroom · $0.25/kWh assumed tariff · before costs. Validate demand and service guardrails before committing.

Review opportunity Finding →

Inspect physical headroom →

CLOSE THE LOOP

What changed in this review

Inspect basis ↗

- 1 maintenance activity completed — Outcome unverified
- 1 policy trial awaiting outcome evidence — Guardrails incomplete
- 0 verified resolutions in these examples — Value not yet recovered

Observed change → comparable evidence → verified outcome → eligible financial value

Business context: Depot delivered **120 kWh** in complete records; **$36.00** scenario tariff estimate. Inspect energy basis →

Other sites lack comparable full-window energy coverage.

Canonical basis: v6.9 8.1 / 8.8 / 8.9; Client Demo Recommendation Screen 1 / A1 · **Question:** Where should management act first, what is at stake, and what would prove improvement?
Preserved: Finding-owned ranked rows; Site / Finding / Action root changes; Action references confined to the Action column. Financials reuses site-owned consequences; unknowns and claim limits remain explicit.
Adapted: A1 business-value hierarchy above the canonical priority table. Three existing sites; objective matrix instead of ungrounded percentages; productive-use and verification visible together. Counts are secondary context.
Deferred: Six-site estate, monthly extrapolation, productive-use share, comparable energy roll-up, asset valuation, reconciliation residual and verified recovered money require their own supporting records. None is inferred from this hour.
Content owners: PortfolioSummary · FindingIndex · PortfolioConsequenceRollup · SiteAssessmentSummary · CapabilityReadiness · ActionSummary · VerificationSummary · **Prototype route:** #/portfolio
