Portfolio

Portfolio Value & Operations

Operating decisions across the estate: cost, service, productive use and asset value

Portfolio: Needs attention

3 simulated sites · 1 mini-grid / 1 cold room / 1 charging hub

Assessment scope & periods ↗

Grow revenue

Capture more value from existing infrastructure and expand earning potential

18–20 kW unused

Productive use at Kobo · idle chargers at Depot · site income not recorded

Kobo · GreenHarvest · Depot

Opportunities · revenue not measured yet

Optimize cost and efficiency

Eliminate avoidable expenditure and get more output from operational resources

$3.31–3.97

Kobo generator time, 1 trial in hand · 3 repair visits without a result at GreenHarvest, cost not recorded

Kobo · GreenHarvest · Depot

Modelled + scenario · one-hour window · reliability checked as a safeguard

Protect asset and capital

Preserve asset value, avoid premature replacement and reduce service disruption

2 sites disrupted

Cold-room exposure · interrupted charging · 4 early warnings on battery, generator, charger and backup · Depot peak at 95% of its limit

Kobo · GreenHarvest · Depot

Measured events and early warnings, counted separately · loss not priced

Assure performance and returns

Establish with defensible evidence whether the infrastructure is delivering expected results

Not established

No verified result yet · no targets declared · evidence gaps at all 3 sites

Kobo · GreenHarvest · Depot

Completed work does not establish savings

3 priority sites · **1** opportunity · **3** site evidence gaps · **3** accepted actions · **8** warnings not yet priced

Distinct consequence categories · no combined savings total

Where management should act first

Findings ranked by consequence and urgency, with evidence confidence alongside.

6 FINDINGS

All priorities | Cost | Risks | Opportunities

6 findings

SITE	FINDING / OPERATING MECHANISM	VALUE / CONSEQUENCE	PRIORITY	CONFIDENCE	ACTION / NEXT MOVE
GreenHarvest Cold-chain	**Backup response failed** F-118 · Automatic start failed; cooling interrupted Protect asset and capital	**Product conditions exposed** Measured peak 8.2°C · loss unpriced 6 Oct · 19:00–20:00	High	High Observed sequence	**ACT-051** Witness an automatic-start test Open
Kobo Mini-grid	**Extended generator support** F-104 · 30 min candidate; charging trade-off remains Optimize cost and efficiency	**$3.31–3.97** Modelled fuel + scenario maintenance 6 Oct · 14:20–15:20	High	Low ⓘ PCS capability gap	**ACT-048** Verify the policy trial Outcome pending
Depot EV charging	**Charging session interrupted** F-130 · Fault-aborted session; root cause unknown Protect asset and capital	**1 interrupted session** Measured events · revenue loss unpriced 6 Oct · 08:00–16:00	Medium	Medium ⓘ 1 other outcome unknown	**ACT-061** Investigate connector 2 Open
GreenHarvest Cold-chain	**Temperature excursion** F-119 · Chamber above 4°C after backup failed Protect asset and capital	**25–35 min above policy** Measured peak 8.2°C · no spoilage determination 6 Oct · 19:00–20:00	Medium	High Stock and loading not recorded	**Review recommendation** Record stock and connect the door log Open
Kobo Mini-grid	**Battery output-limit report missing** F-108 · One 14:50 report absent from the battery controller Assure performance and returns	**30 min unclassified** Evidence gap · limits F-104 6 Oct · 14:20–15:20	Medium	High Reporting cause unknown	**ACT-049** Restore battery-limit reporting Open
Kobo Mini-grid	**Productive-use headroom** F-109 · Recurring renewable capacity available Grow revenue	**18–20 kW usable** Modelled headroom · $2.50 scenario sales Separate 5-day study · 3 eligible days	Medium	Medium ⓘ Demand not established	**Review recommendation** Evaluate a 10 kW productive load Recommendation

Early warnings · not priced yet

Risk — **Repeated maintenance without a result**
GreenHarvest · Optimize cost and efficiency · Backup generator visited 3 times in 60 days (14 Aug, 18 Sep, 6 Oct); the automatic start still failed

Early warning — **Battery below its reserve**
Kobo · Protect asset and capital · 5 of the last 30 days · lowest 22%

Early warning — **Backup start test overdue**
GreenHarvest · Protect asset and capital · Monthly test due 2 Oct, not done

Early warning — **Charger fault and overdue inspection**
Depot · Protect asset and capital · Connector 2 fault on 6 Oct · inspection overdue since 30 Sep

Priority and confidence answer different questions.

Outcomes across the estate

How each site is doing on what matters

	Kobo	GreenHarvest	Depot
Grow revenue	Opportunity Productive electricity sales	Not measured yet Paid cold-room use	Watch Charger use
Optimize cost and efficiency	Needs attention Supply cost per kWh	Needs attention Cost per cooling unit	Not measured yet Energy cost per km
Protect asset and capital	Watch Battery and generator life	Needs attention Stock kept saleable	Needs attention Buses ready to run
Assure performance and returns	Watch Evidence quality	Watch Evidence quality	Watch Evidence quality

Needs attention · Watch · Opportunity · On track · Unknown · Not measured yet

Evidence that would change a decision

Restore Kobo's missing PCS capability report to resolve two indeterminate dispatch intervals.

Inspect the constraint →

GROW USEFUL DEMAND

An opportunity beyond reducing cost

Scenario

10 kW × 1 h — Grain-mill evaluation at Kobo → **$2.50** — Scenario gross sales per eligible window

Within 18–20 kW headroom · $0.25/kWh assumed tariff · before costs. Validate demand and service guardrails before committing.

Review opportunity Finding →

Inspect physical headroom →

CLOSE THE LOOP

What changed in this review

Inspect basis ↗

- **1 maintenance activity completed** — Outcome unverified
- **1 policy trial awaiting outcome evidence** — Guardrails incomplete
- **0 verified resolutions in these examples** — Value not yet recovered

Observed change → comparable evidence → verified outcome → eligible financial value

Business context: Depot delivered **120 kWh** in complete records; **$36.00** scenario tariff estimate. Inspect energy basis →

Other sites lack comparable full-window energy coverage.

Canonical basis: v6.9 8.1 / 8.8 / 8.9; Client Demo Recommendation Screen 1 / A1 · **Question:** Where should management act first, what is at stake, and what would prove improvement?
Preserved: Finding-owned ranked rows; Site / Finding / Action root changes; Action references confined to the Action column. Financials reuses site-owned consequences; unknowns and claim limits remain explicit.
Adapted: A1 business-value hierarchy above the canonical priority table. Three existing sites; objective matrix instead of ungrounded percentages; productive-use and verification visible together. Counts are secondary context.
Deferred: Six-site estate, monthly extrapolation, productive-use share, comparable energy roll-up, asset valuation, reconciliation residual and verified recovered money require their own supporting records. None is inferred from this hour.
