Portfolio

# Portfolio Value & Operations

Operating decisions across the estate: cost, service, productive use and asset value

Portfolio: Needs attention

3 simulated sites · 1 mini-grid / 1 cold room / 1 charging hub

Assessment scope & periods ↗

**Revenue**

**18–20** kW unused

Productive use at Kobo · idle chargers at Depot

Kobo · GreenHarvest · Depot

Opportunities · revenue not measured yet

**Operating cost**

**$3.31–3.97**

Kobo generator time · 1 trial in hand · repeated repairs at GreenHarvest

Kobo · GreenHarvest · Depot

Modelled + scenario · one-hour window

**Service and stock**

**2** sites

Cold-room exposure · interrupted charging · 3 actions and work in hand

Kobo · GreenHarvest · Depot

Measured events · loss not priced

**Asset life**

**4** early warnings

Battery below reserve · overdue servicing · charger fault

Kobo · GreenHarvest · Depot

Early warning · not a condition check

**Return on assets**

**Not measured**

Depot peak at 95% of its limit · site income not recorded

Kobo · GreenHarvest · Depot

Needs income and capital records

**Evidence and assurance**

**Not established**

No verified result yet · evidence gaps at all 3 sites

Kobo · GreenHarvest · Depot

Completed work does not establish savings

**3** priority sites · **1** opportunity · **3** site evidence gaps · **3** accepted actions · **8** warnings not yet priced

Distinct consequence categories · no combined savings total

## Where management should act first

Findings ranked by consequence and urgency, with evidence confidence alongside.

6 FINDINGS

### Early warnings · not priced yet

Risk — **Repeated maintenance without a result**
GreenHarvest · Cooling continuity · Backup generator visited 3 times in 60 days (14 Aug, 18 Sep, 6 Oct); the automatic start still failed

Early warning — **Battery below its reserve**
Kobo · Battery and generator life · 5 of the last 30 days · lowest 22%

Early warning — **Backup start test overdue**
GreenHarvest · Compressor life · Monthly test due 2 Oct, not done

Early warning — **Charger fault and overdue inspection**
Depot · Charger life · Connector 2 fault on 6 Oct · inspection overdue since 30 Sep

### Evidence that would change a decision

Restore Kobo's missing PCS capability report to resolve two indeterminate dispatch intervals.

Inspect the constraint →

GROW USEFUL DEMAND

### An opportunity beyond reducing cost

Scenario

**10** kW × 1 h → **$2.50**

Grain-mill evaluation at Kobo — Scenario gross sales per eligible window

Within 18–20 kW headroom · $0.25/kWh assumed tariff · before costs. Validate demand and service guardrails before committing.

Review opportunity Finding →

Inspect physical headroom →

CLOSE THE LOOP

### What changed in this review

Inspect basis ↗

- **1 maintenance activity completed** — Outcome unverified
- **1 policy trial awaiting outcome evidence** — Guardrails incomplete
- **0 verified resolutions in these examples** — Value not yet recovered

Observed change → comparable evidence → verified outcome → eligible financial value

Business context: Depot delivered **120 kWh** in complete records; **$36.00** scenario tariff estimate. Inspect energy basis →

Other sites lack comparable full-window energy coverage.

**Canonical basis:** v6.9 8.1 / 8.8 / 8.9; Client Demo Recommendation Screen 1 / A1 · **Question:** Where should management act first, what is at stake, and what would prove improvement?
**Preserved:** Finding-owned ranked rows; Site / Finding / Action root changes; Action references confined to the Action column. Financials reuses site-owned consequences; unknowns and claim limits remain explicit.
**Adapted:** A1 business-value hierarchy above the canonical priority table. Three existing sites; objective matrix instead of ungrounded percentages; productive-use and verification visible together. Counts are secondary context.
**Deferred:** Six-site estate, monthly extrapolation, productive-use share, comparable energy roll-up, asset valuation, reconciliation residual and verified recovered money require their own supporting records. None is inferred from this hour.
**Content owners:** PortfolioSummary · FindingIndex · PortfolioConsequenceRollup · SiteAssessmentSummary · CapabilityReadiness · ActionSummary · VerificationSummary · **Prototype route:** #/portfolio
