Portfolio

Portfolio Value & Operations

Operating decisions across the estate: cost, service, productive use and asset value

Portfolio: Needs attention

3 simulated sites · 1 mini-grid / 1 cold room / 1 charging hub

Assessment scope & periods ↗

Operating-cost exposure →

$3.31–3.97

Kobo · 30 min avoidable generator time

Modelled + scenario · one-hour window

Service & stock risk →

2 sites

Cold-room excursion + interrupted charging

Measured events · financial loss unpriced

Productive-use opportunity →

18–20 kW

Kobo · headroom on 3 of 5 days

Modelled · demand validation remains

Asset life →

4 early warnings

Battery below reserve · overdue servicing · charger fault

Early warning · not a condition check

Verified value recovered →

Not established

Intervention outcomes need more evidence

Completed work does not establish savings

3 priority sites · **1** opportunity · **3** site evidence gaps · **3** accepted actions · **8** warnings not yet priced

Distinct consequence categories · no combined savings total

Where management should act first

Findings ranked by consequence and urgency, with evidence confidence alongside.

6 FINDINGS

All priorities | Cost | Risks | Opportunities

6 findings

SITE	FINDING / OPERATING MECHANISM	VALUE / CONSEQUENCE	PRIORITY	CONFIDENCE	ACTION / NEXT MOVE
GreenHarvest Cold-chain	**Backup response failed** F-118 · Automatic start failed; cooling interrupted · Cooling continuity · Stock kept saleable	**Product conditions exposed** Measured peak 8.2°C · loss unpriced 6 Oct · 19:00–20:00	High	High Observed sequence	**ACT-051** Witness an automatic-start test Open
Kobo Mini-grid	**Extended generator support** F-104 · 30 min candidate; charging trade-off remains · Supply cost per kWh	**$3.31–3.97** Modelled fuel + scenario maintenance 6 Oct · 14:20–15:20	High	Low ⓘ PCS capability gap	**ACT-048** Verify the policy trial Outcome pending
Depot EV charging	**Charging session interrupted** F-130 · Fault-aborted session; root cause unknown · Buses ready to run	**1 interrupted session** Measured events · revenue loss unpriced 6 Oct · 08:00–16:00	Medium	Medium ⓘ 1 other outcome unknown	**ACT-061** Investigate connector 2 Open
GreenHarvest Cold-chain	**Temperature excursion** F-119 · Chamber above 4°C after backup failed · Stock kept saleable	**25–35 min above policy** Measured peak 8.2°C · no spoilage determination 6 Oct · 19:00–20:00	Medium	High Stock and loading not recorded	**Review recommendation** Record stock and connect the door log Open
Kobo Mini-grid	**Battery output-limit report missing** F-108 · One 14:50 report absent from the battery controller · Evidence quality	**30 min unclassified** Evidence gap · limits F-104 6 Oct · 14:20–15:20	Medium	High Reporting cause unknown	**ACT-049** Restore battery-limit reporting Open
Kobo Mini-grid	**Productive-use headroom** F-109 · Recurring renewable capacity available · Productive electricity sales	**18–20 kW usable** Modelled headroom · $2.50 scenario sales Separate 5-day study · 3 eligible days	Medium	Medium ⓘ Demand not established	**Review recommendation** Evaluate a 10 kW productive load Recommendation

Early warnings · not priced yet

Risk — **Repeated maintenance without a result**
GreenHarvest · Cooling continuity · Backup generator visited 3 times in 60 days (14 Aug, 18 Sep, 6 Oct); the automatic start still failed

Early warning — **Battery below its reserve**
Kobo · Battery and generator life · 5 of the last 30 days · lowest 22%

Early warning — **Backup start test overdue**
GreenHarvest · Compressor life · Monthly test due 2 Oct, not done

Early warning — **Charger fault and overdue inspection**
Depot · Charger life · Connector 2 fault on 6 Oct · inspection overdue since 30 Sep

Priority and confidence answer different questions.

Outcomes across the estate

How each site is doing on what matters

	Kobo	GreenHarvest	Depot
Revenue	**Unknown** Productive electricity sales	**Not measured yet** Paid cold-room use	**Watch** Charger use
Operating cost	**Needs attention** Supply cost per kWh	**Not measured yet** Cost per cooling unit	**Not measured yet** Energy cost per km
Service and stock	**Unknown** Reliable service	**Needs attention** Cooling continuity	**Needs attention** Buses ready to run
Asset life	**Watch** Battery and generator life	**Watch** Compressor life	**Watch** Charger life
Return on assets	**Not measured yet** Site profitability	**Not measured yet** Paid cold-room use	**On track** Room before expansion
Evidence	**Watch** Evidence quality	**Watch** Evidence quality	**Watch** Evidence quality

Needs attention · Watch · On track · Unknown · Not measured yet

Evidence that would change a decision

Restore Kobo's missing PCS capability report to resolve two indeterminate dispatch intervals.

Inspect the constraint →

GROW USEFUL DEMAND

An opportunity beyond reducing cost

Scenario

10 kW × 1 h — Grain-mill evaluation at Kobo

→

$2.50 — Scenario gross sales per eligible window

Within 18–20 kW headroom · $0.25/kWh assumed tariff · before costs. Validate demand and service guardrails before committing.

Review opportunity Finding →

Inspect physical headroom →

CLOSE THE LOOP

What changed in this review

Inspect basis ↗

- **1 maintenance activity completed** — Outcome unverified
- **1 policy trial awaiting outcome evidence** — Guardrails incomplete
- **0 verified resolutions in these examples** — Value not yet recovered

Observed change → comparable evidence → verified outcome → eligible financial value

Business context: Depot delivered **120 kWh** in complete records; **$36.00** scenario tariff estimate. Inspect energy basis →

Other sites lack comparable full-window energy coverage.

Canonical basis: v6.9 8.1 / 8.8 / 8.9; Client Demo Recommendation Screen 1 / A1 · **Question:** Where should management act first, what is at stake, and what would prove improvement?
Preserved: Finding-owned ranked rows; Site / Finding / Action root changes; Action references confined to the Action column. Financials reuses site-owned consequences; unknowns and claim limits remain explicit.
Adapted: A1 business-value hierarchy above the canonical priority table. Three existing sites; objective matrix instead of ungrounded percentages; productive-use and verification visible together. Counts are secondary context.
Deferred: Six-site estate, monthly extrapolation, productive-use share, comparable energy roll-up, asset valuation, reconciliation residual and verified recovered money require their own supporting records. None is inferred from this hour.
